01 ABOUT FREDDY

Freddy founded the **Claude Singapore Community**, a non-profit community that works to educate, empower and encourage people to use AI, in April 2026. It is Singapore's largest Claude group for developers and founders, and he teaches its workshops himself. Every session is hands-on. Six months on the community has **20,000+ members** and has run workshops in Singapore, Indonesia, Vietnam, Thailand and Malaysia.

His company **Claude Labs**, a member of the **Anthropic Partner Network** and the **Amazon Partner Network**, helps

government agencies and large enterprises roll out AI safely: it writes the governance frameworks, policies and permissions, sets up infrastructure that meets safety and compliance requirements, then integrates Claude and trains the teams. The groundwork is in place before the first use case goes live. He built **claudearchitects.org**, the largest resource for Claude architects in the world, took first place at the Anthropic x Temasek x Genspark Hackathon, and hosted **Claude for Enterprise with AWS and Anthropic**, Anthropic's first public speaking event in Singapore.
